The course curriculum framework and modules have been developed based on world's best pedagogical practices and by top professionals. Our goal is to ensure that every participant has a productive and engaging experience with the program course work. This course is developed for Healthcare Professionals, Nurses, Doctors, and Infection Control Practitioners. In this course you will learn about Infection Prevention & Control requirements and its implementation in healthcare settings.

The course consists of two sets of modules, the basic and advance modules. There are 15 modules in this course consisting of Lectures, support material and videos along with the assessment quizzes. The participant has to complete the quizzes at the end of each module to get the certificate.

The passing percentage is 60%.

The objective of this course is to:

- Know the basics of standard infection control Practices.
- Describe the Chain of Infection.
- Discuss the Basics of Microbiology.
- Know the Transmission-Based Precautions.
- Discuss the Patient Safety.
- Describe the Injection Safety.
- Know the Healthcare Waste Management.
- Discuss the surveillance of Healthcare Associated Infection (HAIs) and Care Bundles.
- Discuss the Cleaning & Disinfection of Equipment.

POL:

Describe the Infection Control for Housekeeping Staff.

Infection control prevents or stops the spread of infections in healthcare settings. This course includes an overview of how infections spread, ways to prevent the spread of infections, and more detailed recommendations by type of healthcare setting.
