PG-DIPLOMA IN CLIMATE CHANGE A (DCC)

06-Months

PG-DIPLOMA IN CLIMATE CHANGE A (DCC)

Course Overview

The Diploma in Climate Change is an advanced online course for individuals wanting to strengthen their knowledge and improve their career prospects. This course will introduce you to the many facets of climate change – providing you with information about the development of Earth’s structures, its biomes, climate regulation, and oceans. You’ll also explore the anthropogenic influences of agriculture and industrialization, humanity’s response to climate change and what the future of climate change may look like.

COURSE OBJECTIVES

- Understand the development of Earth’s structures, its biomes, climate regulation, and oceans
- Become familiar with the anthropogenic influences of agriculture and industrialization on climate change.
- Learn about the effects of climate change on the planet and humanity
- Explore climate response strategies and the possible future of climate change

COURSE FEE

The course fee is Rs. **60,000/-** + GST, which includes a comprehensive programme, engagement with fellow participants and experts, and certificate will be provided jointly from the Health Services Academy-Promoting Public Health (A Degree Awarding Institute) Islamabad.

Who Should Attend?

This program is ideal for individuals with a passion for tackling climate change and sustainability issues, regardless of whether they are just starting their journey or are experienced professionals looking to deepen their expertise. The course is designed for:

- Graduates with a degree in any discipline who wish to specialise in climate change, sustainability, or related fields. A bachelor's degree in any field is recommended, though no specific academic background is required.
- Professionals from various sectors—government, NGOs, international organisations, corporations, or educational institutions—who are seeking to advance their knowledge or career in climate change and low-carbon development.

3. Individuals with relevant experience in environmental science, policy, development, or sustainability-related fields who want to acquire advanced analytical skills and specialised knowledge to address climate issues

Course Experts

1. Dr Zeeshan Ahmad Khan
PhD Public Health Scholar, Health Services Academy Islamabad
2. Sher Muhammad Hazara
PhD Public Health Scholar, Health Services Academy Islamabad
3. Dr Abdur Rashid
PhD Climate Change from Shanxi University China
